## **N** SymphonyAl

## Supply chain solutions for modern retail

# Al-powered supply chain solutions

- Demand Forecasting
- Demand Planner Copilot
- Warehouse Replenishment
- Store Replenishment
- Inventory Allocation
- Supply Chain Intelligence
- Master Data Management
- Distributed Order Management
- Vendor Portal

#### SymphonyAl's supply chain suite provides the agility, precision, and foresight needed to navigate the complexities of Retail's supply chain.

Built specifically of the retail and CPGs, our Alpowered solutions seamlessly integrate predictive, prescriptive, and generative AI technologies to revolutionize the way you manage, optimize, and streamline your supply chain operations.

#### Better forecasting, collaboration, and decision-making with Alpowered solutions.

#### End-to-end platform

Drive collaboration and data-driven decision making in one platform for retailers and CPGs

#### Seamless integration of data and workflows

Cloud-native and built to integrate with existing first and third-party applications

#### Greater accuracy and precision

Run what-if analyses and understand historical context with predictive and generative AI

30 Years of retail and CPG leadership

70+

Customers in 70+ countries

25

Of the top 25 CPG manufacturers trust SymphonyAl

1000s

Of retail brands

15

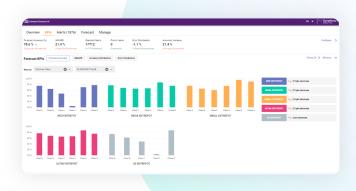

Of the top 25 grocery retailers trust SymphonyAl

## 100s

Of national and regional chains

#### **Demand Forecasting**

The only fully Al-powered demand forecast platform for retailers and CPGs, for greater accuracy and better collaboration across planning and replenishment.

#### **Replenishment & Allocation**

The only Al-powered supply chain platform that automates and optimizes the entire replenishment and allocation process with a single view across your entire inventory.

#### **Supply Chain Intelligence**

Enabling powerful collaboration between retail and CPG supply chains based on a single version of the truth and driving measurable business value for both parties.

#### **Supply Chain Management**

The only fully integrated supply chain platform that serves as a single source of data within a synchronized ecosystem of master data, inventory, order, and vendor management.
